# STATE OF DELAWARE NETWORK PROXY SETUP

The following is a step by step procedure for configuring QuickTime for the computers

on the State of Delaware Network.

If you are attempting to view a State of Delaware Webcast on the "public Internet" you *DO NOT* need to follow these steps. Simply view the video via: http://webcast.delaware.gov:8080/webcasts/DE_State_Webcast.shtml**.**

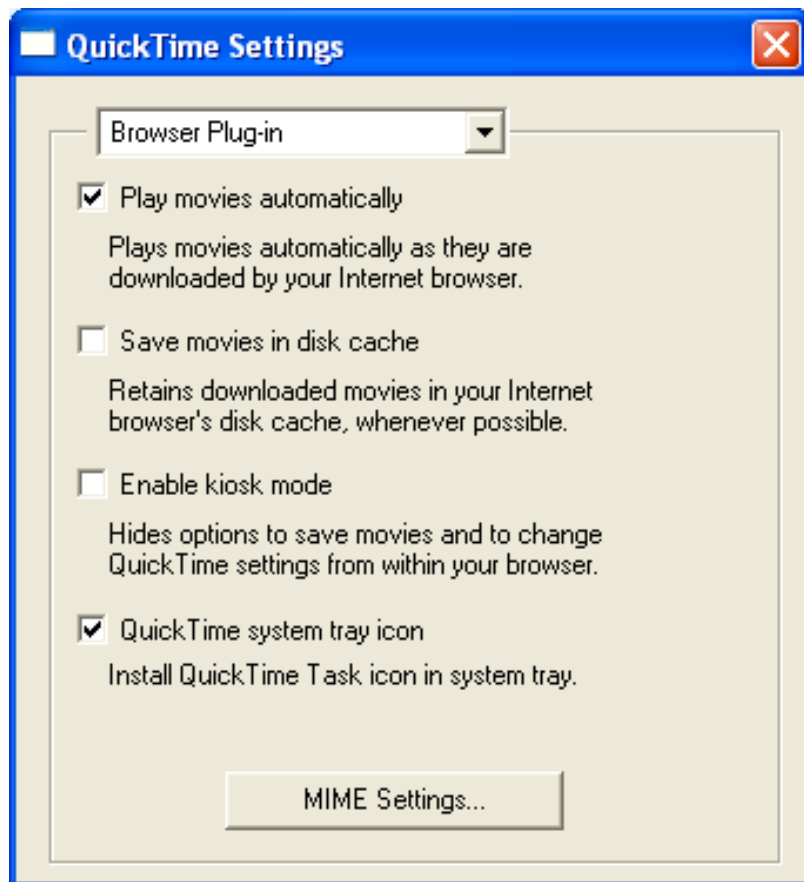

To view a State of Delaware Webcast from a K12/Higher Ed facility, DO NOT follow the steps below. Please visit http://webcast.delaware.gov:8080/webcasts/Edu-proxy.pdf

---

To view a State of Delaware Webcast from a State, complete these steps only one time. Upon opening http://webcast.delaware.gov:8080/webcasts/DE_State_Webcast.shtml**, the following screen will display.**
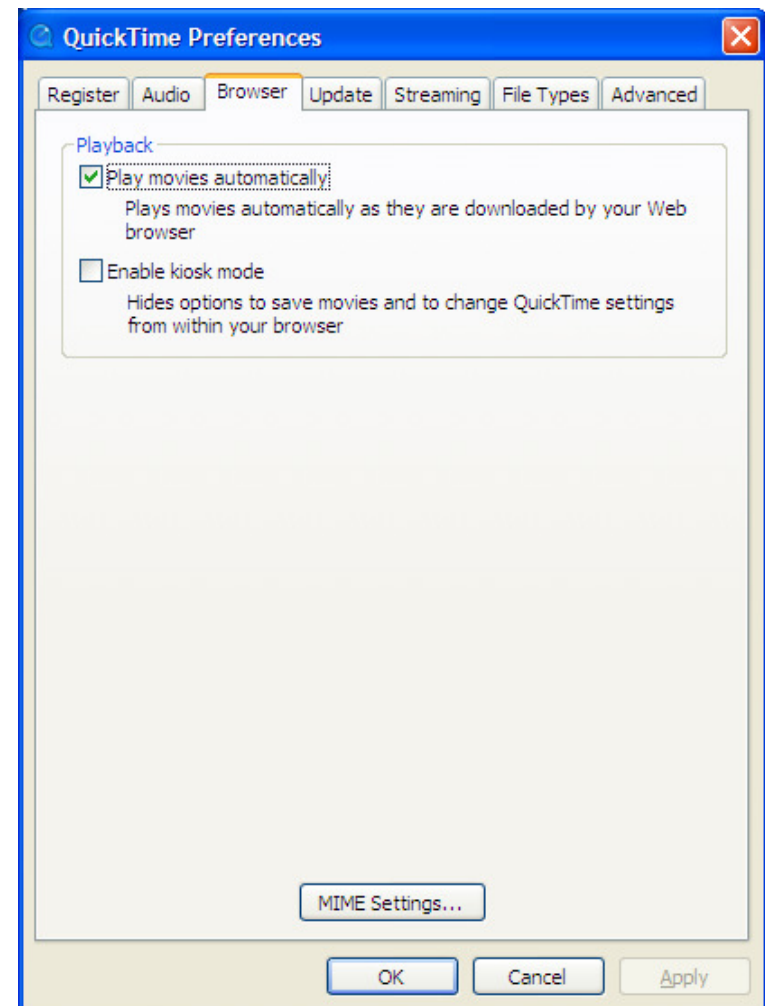

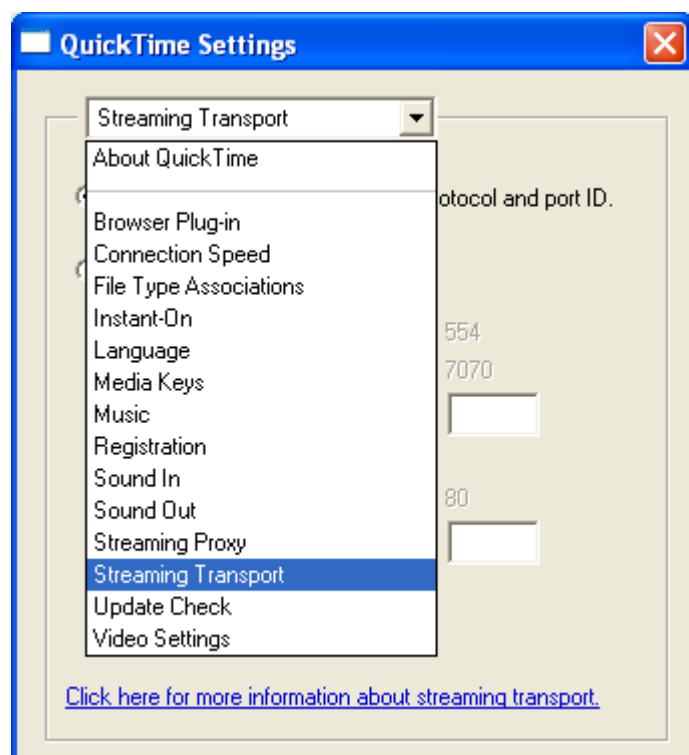

Right-click on the blue circle / Q-shape

| If you see the screen below, follow the steps in this column – ignore the steps in the right column.	If you see the screen below, follow the steps in this column – ignore the steps in the left column.

Click the down-arrow to the right of "Browser Plug-in" and select "Streaming Transport" from the drop-down list.

Click on the "Streaming" tab
Under "streaming speed", select "Intranet/LAN" from the drop-down box.

On the "Streaming Transport" page, select "use HTTP, Port ID:" and type "8080" as shown in the box below.

Select the "Advanced" tab, and under Streaming / Transport setup, select "Custom" from the transport setup drop-down box.

Select the down-arrow to the right of "Streaming Transport" and select "Streaming Proxy"

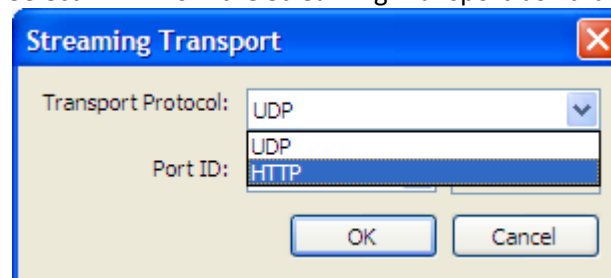

Select "RTSP Proxy Server" and type wwwproxy.state.de.us in the address box and 554 as the port (as shown below).
        IMPORTANT NOTE: this is wwwproxy.state.de.us *NOT*
   www.proxy.state.de.us

Click the "X" at the top right of this window to exit the QuickTime settings.

If the video does not auto start, close the window and access
http://webcast.delaware.gov:8080/webcasts/DE_State_Webcast.shtml# again.

Select HTTP from the Streaming Transport box that appears

Upon selecting HTTP, select "Custom" from the port id drop-down box and type "8080" in the white box (as shown below) and select OK.

NOTE that you MAY BRIEFLY see a green image displayed (as shown below), but the green will fade and the webcast video will be shown within a few seconds.

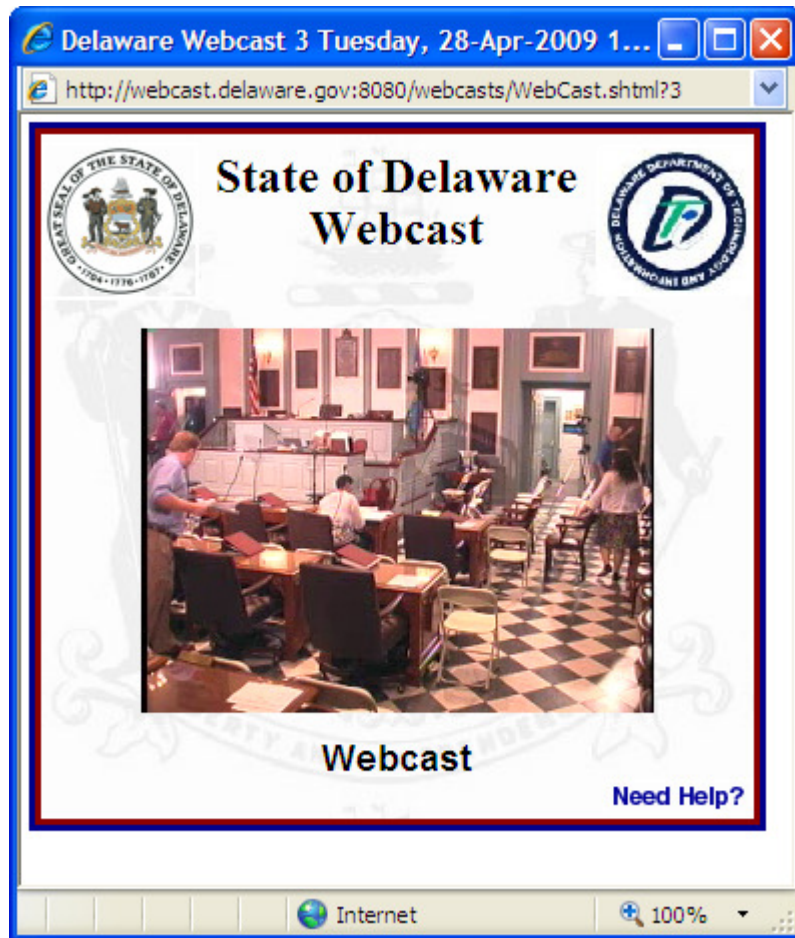

While the advanced tab is still open, select the RTSP Proxy Server and type wwwproxy.state.de.us in the address box and 554 as the port (as shown below).   IMPORTANT NOTE: this is wwwproxy.state.de.us *NOT* www.proxy.state.de.us

Select OK
If the video does not auto start, close the window and access http://webcast.delaware.gov:8080/webcasts/DE_State_Webcast.shtml# again.
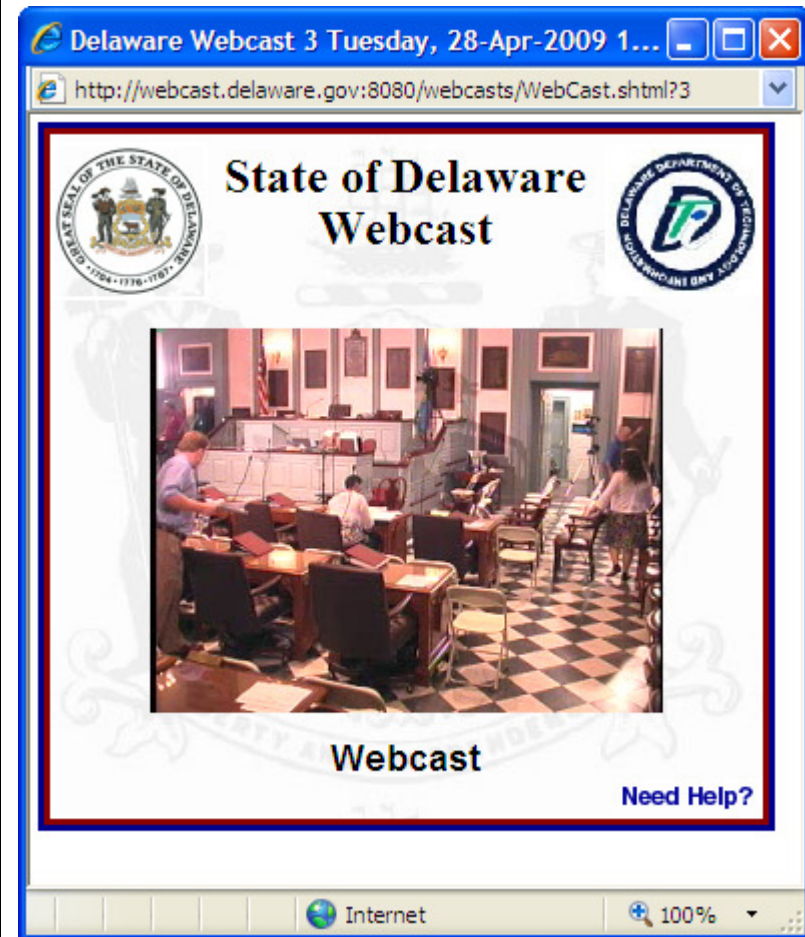

The webcast video should now appear.

NOTE that you MAY BRIEFLY see a green image displayed (as shown below), but the green will fade and the video will be shown within a few seconds.

intentionally left blank	The webcast video should now appear.

Should you still unable to view the webcast AFTER following the steps above…
